CORPORATE INSTITUTE RELATIONSHIP CELL

STUDENT'S WEEKLY DIARY/ WEEKLY LOG

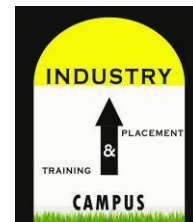

WEEK 1		DATE	7 July to 11 July	
Time of arrival	9:00 AM	Time of Departure	6:00 PM	Remarks
Dept/Division	COMP	Name of finished Product	VastuValue	
Name of HOD/ Supervisor With e-mail id	HOD:	Snehal Bhogan		
	Supervisor:	Kedar Sawant		
		Prayut Parsekar		
Main points of the week				
Day 1: Studied key AWS services like S3, Lambda, API Gateway, and DynamoDB, and understood their roles in building a secure, scalable cloud app with India-specific deployment practices.				
Day 2: Learned Angular basics: project setup with Angular CLI, components, modules, routing, and using ng serve to run the app. Also made a small mini project like a counter to practice components and event binding.				
Day 3: Created a flowchart of the AWS architecture for the internship project, showing how different services like S3, API Gateway, Lambda, and DynamoDB work together in the web app.				
Day 4: Analyzed and selected AWS services for a cloud-based web app, including S3, CloudFront, ACM, API Gateway, Lambda, DynamoDB, and SES, with a focus on features and cost in USD and INR.				
Day 5: Built a prototype web app with Angular frontend and .NET 8 Web API backend. It collects user data, sends it to the backend, and displays results. The app was tested locally and will be used for deployment testing on AWS				
Day 6: Remarks:				

Signature of Industry Supervisor

STUDENT'S WEEKLY DIARY/ WEEKLY LOG

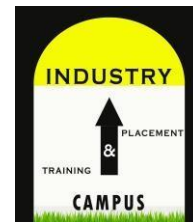

WEEK 2		DATE	14 July to 18 July	
Time of arrival	9:00 AM	Time of Departure	6:00 PM	Remarks
Dept/Division	COMP	Name of finished Product	VastuValue	
Name of HOD/ Supervisor With e-mail id	HOD:	Snehal Bhogan		
	Supervisor:	Kedar Sawant		
		Prayut Parsekar		
Main points of the week				
Day 1: Learned to use Amazon S3 for creating a bucket, uploading and hosting static files, and setting public access permissions. Also watched a tutorial to understand its use better and explored the estimated costs needed for the project.				
Day 2: Started a new prototype project for AWS cloud deployment using Angular for the frontend and .NET for the backend. Integrated Amazon DynamoDB to store and retrieve form data, preparing the system for a scalable and serverless architecture.				
Day 3: Started making AWS Lambda functions to save form data into DynamoDB. This helps move the backend to a serverless system, which will be easier to manage and can grow with more users.				
Day 4: Successfully completed the prototype project. The Angular frontend is hosted on S3, and form data is sent via API Gateway to a Lambda function, which stores it in DynamoDB. This shows a complete serverless setup using core AWS services.				
Day 5: Presented the project progress to company management, explaining the technologies used, how the system works, and the benefits of the serverless architecture implemented				
Day 6: Remarks:

STUDENT'S WEEKLY DIARY/ WEEKLY LOG

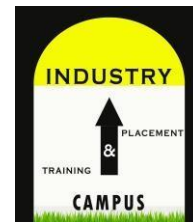

WEEK 3		DATE	21 July to 25 July	
Time of arrival	9:00 AM	Time of Departure	6:00 PM	Remarks
Dept/Division	COMP	Name of finished Product	VastuValue	
Name of HOD/ Supervisor With e-mail id	HOD:	Snehal Bhogan		
	Supervisor:	Kedar Sawant		
		Prayut Parsekar		
Main points of the week				
Day 1: Completed the Angular 19 frontend prototype of the project with all key UI components and user flow. After the presentation, we implemented a few suggested changes, including creating separate Lambda functions for GET and POST.				
Day 2: Had a productive meeting with AWS experts to clarify our doubts about the Vastu Value cloud architecture. They provided clear guidance on deployment, security best practices, and how to scale using AWS services. We also completed the GitHub setup for version control and future CI/CD integration				
Day 3: Set up Amazon SES (Simple Email Service) for the AWS-based prototype project. Learned to verify email addresses, configure permissions, and send emails using a Lambda function. Successfully integrated email functionality to support user communication within the serverless application.				
Day 4: Completed the integration of Amazon SES for email delivery and Amazon SQS for message queuing in the prototype project. Also set up a CI/CD pipeline using GitHub for automated deployment of Lambda functions and frontend code, making the system more efficient, scalable, and production-ready.				
Day 5: Completed work on Amazon SQS and understood how it connects with Lambda for handling background tasks. Also explored the frontend code of the main company project to understand its flow and structure. This helped strengthen my understanding of the complete request-response cycle				
Day 6: Remarks:

STUDENT'S WEEKLY DIARY / WEEKLY LOG

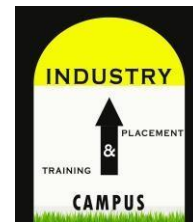

WEEK 4		DATE	28 July to 01 August	
Time of arrival	9:00 AM	Time of Departure	6:00 PM	Remarks
Dept/Division	COMP	Name of finished Product	VastuValue	
Name of HOD/ Supervisor With e-mail id	HOD:	Snehal Bhogan		
	Supervisor:	Kedar Sawant		
		Prayut Parsekar		
Main points of the week				
Day 1: Visualized the entire database structure using dbdiagram.io to understand the relationships between tables like ObjectData, Location, PaymentDetail, and others. This improved my understanding of how different parts of the system are connected.				
Day 2: Analyzed frontend API integrations across multiple Angular components to understand how data like valuation results, transactions, and location-based insights are fetched and displayed using services. Explored component-service interactions in a real-world project.				
Day 3: Worked on identifying and documenting all API calls used in the project, focusing on how different components interact with backend services. This improved understanding of data flow between frontend and backend and provided clarity on full-stack application integration				
Day 4: Finalized the complete list of all API calls from the Angular frontend. Also began setting up the AWS Lambda function for backend processing and integration with API Gateway and DynamoDB				
Day 5: Worked on creating and deploying a .NET 8 AWS Lambda function named GoogleMapsLambda. This function uses the Google Maps API to get location information such as city and state based on latitude and longitude provided in the request.				
Day 6: Remarks:

STUDENT'S WEEKLY DIARY / WEEKLY LOG

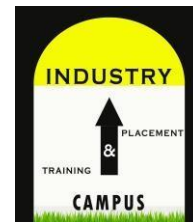

WEEK 5		DATE	04 August to 08 August	
Time of arrival	9:00 AM	Time of Departure	6:00 PM	Remarks
Dept/Division	COMP	Name of finished Product	VastuValue	
Name of HOD/ Supervisor With e-mail id	HOD:	Snehal Bhogan		
	Supervisor:	Kedar Sawant		
		Prayut Parsekar		
Main points of the week				
Day 1: Created and deployed a Lambda function on AWS to handle apartment form data submission. Integrated it with an SQS queue, defined the data model, tested the Lambda function manually using the AWS console, and confirmed that messages are correctly reaching the queue. UI integration and testing is pending.				
Day 2: Connected the AWS Lambda function (ApartmentFormLambda) to API Gateway using an HTTP-based REST API. Configured CORS to allow access and deployed the endpoint. Successfully tested the API using Postman to ensure the Lambda function receives and processes the form data correctly.				
Day 3: Reviewed the existing Lambda function that sends apartment form data to SQS. Planned the next step to create another Lambda function that will read messages from the queue and save them into DynamoDB for use in the valuation report.				
Day 4: Set up an AWS Lambda function to save apartment form data in DynamoDB and send it to an SQS queue. Connected it through API Gateway, enabled CORS, and tested the API successfully				
Day 5: Reviewed the AppraisalController to understand its workflow for handling apartment price calculation requests, including input validation, mapping request data to internal models, calling the pricing service, and logging the results asynchronously.				
Day 6: Remarks:

STUDENT'S WEEKLY DIARY / WEEKLY LOG

WEEK 6		DATE	11 August to 14 August	
Time of arrival	9:00 AM	Time of Departure	6:00 PM	Remarks
Dept/Division	COMP	Name of finished Product	VastuValue	
Name of HOD/ Supervisor With e-mail id	HOD:	Snehal Bhogan		
	Supervisor:	Kedar Sawant		
		Prayut Parsekar		
Main points of the week				
Day 1: Lambda Function for LocationDetails: Developed and deployed the LocationDetails Lambda function to handle location-specific data processing. The function was integrated with the required API endpoints and tested for basic functionality				
Day 2: Completed testing the AWS Lambda function interacting with DynamoDB. Fixed issues related to DynamoDB key mismatches and validated request formats. The Lambda now works as expected with DynamoDB.				
Day 3: Created the SaveOrResendOtpLambda function, which generates and sends OTPs to users via email. It stores the hashed OTP in DynamoDB with an expiration time and limits repeated requests to prevent abuse, using AWS Lambda and Amazon SES				
Day 4: Completed an AWS Lambda function to send OTPs to users via email for verification. It uses Amazon SES to send the email and DynamoDB to store the OTP with an expiry time. Successfully tested and integrated with the frontend for the Vastu Value project.				
Day 5:				
Day 6: Remarks:

STUDENT'S WEEKLY DIARY / WEEKLY LOG

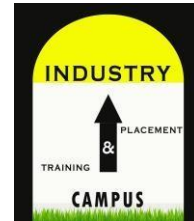

WEEK 7		DATE	18 August to 22 August	
Time of arrival	9:00 AM	Time of Departure	6:00 PM	Remarks
Dept/Division	COMP	Name of finished Product	VastuValue	
Name of HOD/ Supervisor With e-mail id	HOD:	Snehal Bhogan		
	Supervisor:	Kedar Sawant		
		Prayut Parsekar		
Main points of the week				
Day 1: Implemented an AWS Lambda function that fetches the required data from an external API and stores the final valuation results in the database. Started working on configuring and deploying a Lambda with Razorpay integration.				
Day 2: Worked on fixing the errors displayed on the final result page and created a flow diagram illustrating the complete architecture, including AWS Lambda functions, DynamoDB, S3, Cognito, and API Gateway connections. Also explored and made progress on the payment integration part, which is still in progress.				
Day 3: Refined the final evaluation report for accuracy and clarity, and deployed Lambda functions for Razorpay API integration to handle payment transactions seamlessly.				
Day 4: Continued development on the payment Lambda for Razorpay API integration, focusing on implementing and testing the functionality to handle payment transactions efficiently.				
Day 5: Worked further on the payment Lambda, continuing implementation and testing to ensure reliable and efficient handling of Razorpay payment transactions.				
Day 6: Remarks:

STUDENT'S WEEKLY DIARY/ WEEKLY LOG

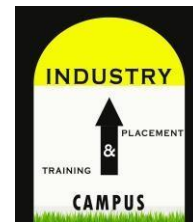

WEEK 8		DATE	26 August to 30 August	
Time of arrival	9:00 AM	Time of Departure	6:00 PM	Remarks
Dept/Division	COMP	Name of finished Product	VastuValue	
Name of HOD/ Supervisor With e-mail id	HOD:	Snehal Bhogan		
	Supervisor:	Kedar Sawant		
		Prayut Parsekar		
Main points of the week				
Day 1: Continued working on the payment Lambda, focusing on implementation and testing to ensure reliable and efficient handling of Razorpay payment transactions.				
Day 2: Completed the development of the Payment Lambda function, ensuring proper integration with the application's workflow for handling transactions. The function has been tested for core functionality and is ready for further validation.				
Day 3:				
Day 4:				
Day 5: Delivered a presentation to the CEO outlining the project overview, highlighting key components, workflows, and planned deliverables. Started the documentation process for the project to capture architecture, workflows, and module-level details.				
Day 6: Remarks:

SUPERVISOR EVALUATION OF INTERN

Student Name: _____ Date: _____

Work Supervisor: _____ Title: _____

Company/Organization: _____

Internship Address: _____

Dates of Internship: From _____ To _____

Please evaluate your intern by indicating the frequency with which you observed the following behaviors:

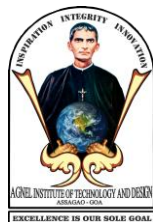

Parameters	Needs improvement	Satisfactory	Good	Excellent
Behaviors				
Performs in a dependable manner				
Cooperates with co-workers and supervisors				
Shows interest in work				
Learns quickly				
Shows initiative				
Produces high quality work				
Accepts responsibility				
Accepts criticism				
Demonstrates organizational skills				
Uses technical knowledge and expertise				
Shows good judgment				
Demonstrates creativity/originality				
Analyzes problems effectively				
Is self-reliant				
Communicates well				
Writes effectively				
Has a professional attitude				
Gives a professional appearance				
Is punctual				
Uses time effectively				

Overall performance of student intern (circle one):

(Needs improvement/ Satisfactory/ _____ Good/ _____ Excellent)

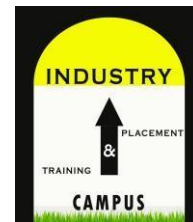

Additional comments, if any:

Signature of Industry supervisor _____ HR Manager _____

STUDENT FEEDBACK OF INTERNSHIP (TO BE FILLED BY STUDENTS AFTER INTERNSHIP COMPLETION)

Student Name: _____ Date: _____

Industrial Supervisor: _____

Title: _____

Supervisor Email: _____ Internship is: _____ Paid_Unpaid _____

Company/Organization: _____

Internship Address: _____

Faculty Coordinator: _____ Department: _____

Dates of Internship: From _____

To _____

Please fill out the above in full detail

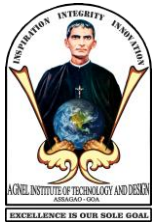

Give a brief description of your internship work (title and tasks for which you were

responsible): Was your internship experience related to your major area of study?

_____ Yes, to a large degree _____ Yes, to a slight degree _____ No, not related

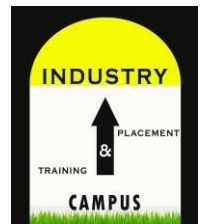

at all Indicate the degree to which you agree or disagree with the following statements.

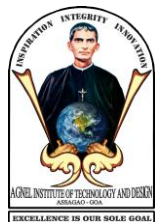

This experience has:	Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Given me the opportunity to explore a career field					
Allowed me to apply classroom theory to practice					
Helped me develop my decision-making and problem-solving skills					
Expanded my knowledge about the work world prior to permanent employment					
Helped me develop my written and oral communication skills					
Provided a chance to use leadership skills (influence others, develop ideas with others, stimulate decision-making and action)					
This experience has:	Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
Expanded my sensitivity to the ethical implications of the work involved					

AGNEL INSTITUTE OF TECHNOLOGY AND DESIGN ASSAGAO, BARDEZ GOA

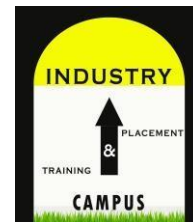

CORPORATE INSTITUTE RELATIONSHIP CELL

AGNEL INSTITUTE OF TECHNOLOGY AND DESIGN ASSAGAO, BARDEZ GOA

CORPORATE INSTITUTE RELATIONSHIP CELL

Made it possible for me to be more confident in new situations					
Given me a chance to improve my interpersonal skills					
Helped me learn to handle responsibility and use my time wisely					
Helped me discover new aspects of myself that I didn't know existed before					
Helped me develop new interests and abilities					
Helped me clarify my career goals					
Provided me with contacts which may lead to future employment					
Allowed me to acquire information and/ or use equipment not available at my Institute					

In the Institute internship program, faculty members are expected to be mentors for students. Do you feel that your faculty coordinator served such a function? Why or why not?

How well were you able to accomplish the initial goals, tasks and new skills that were set down in your learning contract? In what ways were you able to take a new direction or expand beyond your contract? Why were some goals not accomplished adequately?

In what areas did you most develop and improve?

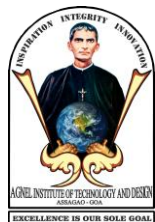

What has been the most significant accomplishment or satisfying moment of your

internship? What did you dislike about the internship?

Considering your overall experience, how would you rate this internship? (Circle

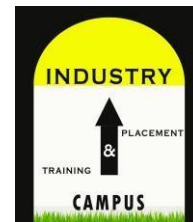

one). (Satisfactory/ Good/ Excellent)

Give suggestions as to how your internship experience could have been improved. (Could you have handled added responsibility? Would you have liked more discussions with your professor concerning your internship? Was closer supervision needed? Was more of an orientation required?)
